

Hands-On AI Lab

Maybe AI **isn't for you**. That's okay.

Come find out before you decide.

Learn enough to choose.

AI may not be your thing and you may be tired of people bringing it up. This event is about showing you exactly what AI really is, what all the hype is about, and giving you enough first hand information. Try everyday examples, ask questions, and decide for yourself whether any of it belongs in your life. No adoption is required.
